3D Graphics & ML – CEO of Sports Technology Company Effxcts LLC

EDUCATION

University of Florida

Aug 2022 – May 2026

Herbert Wertheim College of Engineering

Gainesville, FL

- **Degree:** Bachelor of Science in Computer Science – Minor in Mathematics
- **GPA:** 3.93 / 4.00

EXPERIENCE

Effxcts LLC

Jan 2021 – Present

Founder & CEO

Boston, MA

- Founded Effxcts LLC, developing computer vision and 3D visualization systems for sports clients.
- Led 30+ projects for Lakers, Warriors, Mavericks, ESPN, NHL, BR, Red Bull, achieving 100M+ views.
- Developed semi-automated pipeline for 4D play reconstruction from monocular basketball broadcast video.

Skyhook Technologies

Jul 2025 – Present

Software Engineering Intern

Gainesville, FL

- Sports technology startup developing 3D graphics from player pose data for clients such as ESPN.
- Built a pipeline for automatic avatar generation of 500+ NBA players, leveraging various ML models.
- Contributed across the full product stack, including product ideation, Python automation pipelines, backend systems, frontend tooling, Unreal Engine, and Blender workflows.

Children's Hospital of Philadelphia at Penn

May 2024 – Aug 2024

Machine Learning Researcher

Philadelphia, PA

- Constructed image processing pipeline to extract quantitative features from 300+ kidney scans.
- Trained a convolutional neural network with a 0.90 AUROC to predict surgery from identified features.
- Integrated three ML models into web-based tools with REST APIs for improved usability.
- Authored a manuscript and abstract, published in the Journal of Urology.

PROJECTS

Basketball Shot Detection - Deep Learning & Computer Vision

Jul 2023 – Aug 2023

- Developed a real-time basketball shot tracker with YOLOv8 models, reaching 20x speed with CUDA.
- Achieved 95% score accuracy and 97% shot accuracy by implementing data-cleaning algorithms.

SKILLS

Programming Languages: Python, C++, JavaScript/HTML/CSS

Tools: Git, Claude Code, Codex

Software Engineering: Full-Stack, REST APIs, Flask

Computer Graphics: Blender, Unreal Engine, Adobe After Effects

Machine Learning: PyTorch, OpenCV, Scikit-learn, Pandas, NumPy, CUDA, Matplotlib

Other: Problem-Solving, Adaptability
